

SUPPORTNOVA E-COMMERCE COMPANY — MASTER POLICY FRAMEWORK

Enterprise Operations, Legal Governance and AI Security Policy Framework

Company Scope and Purpose:

This official master document of SupportNova E-Commerce Company consolidates 20 highly detailed corporate policy statements designed for the marketplace ecosystem. The framework governs customer accounts, merchant onboarding, logistics SLAs, return inspection workflows, anti-counterfeit protection, and comprehensive AI safety standards with correct grammar and prominent company identification.

Policy Statement 1	Customer Registration, Account Verification and Terms of Use Policy
Policy Statement 2	Seller Onboarding, Verification and Merchant Registration Policy
Policy Statement 3	Order Processing, Packaging and Merchant Fulfillment Standard Operating Procedure
Policy Statement 4	Express Logistics, Delivery Service Level Agreement and Cash on Delivery Policy
Policy Statement 5	Customer Returns, Refund and Change of Mind Policy
Policy Statement 6	Prohibited, Restricted and Illicit Products Compliance Policy
Policy Statement 7	Anti-Counterfeit, Intellectual Property and Brand Protection Policy
Policy Statement 8	Merchant Rating System, Performance Metrics and Penalty Matrix Standard Operating Procedure
Policy Statement 9	Payment Processing, Escrow Services and Financial Settlement Policy
Policy Statement 10	Official Brand Store Regulations and Store Charter Policy
Policy Statement 11	Customer Reviews, Ratings and Anti-Review Manipulation Policy
Policy Statement 12	Vouchers, Flash Sales and Promotional Campaign Participation Rules
Policy Statement 13	Customer Service, Live Chat Service Level Agreement and Escalation Governance Policy
Policy Statement 14	Cross-Border Global Collection Commerce and Import Customs Standard Operating Procedure
Policy Statement 15	Customer Data Privacy, Protection and General Data Protection Regulation Policy
Policy Statement 16	Fraud Prevention, Account Security and Anti-Scam Governance Standard Operating Procedure
Policy Statement 17	Fulfillment by SupportNova Express Warehouse Operations Standard Operating Procedure
Policy Statement 18	Hazardous Materials, Lithium Battery and Dangerous Goods Transport Standard Operating Procedure
Policy Statement 19	Force Majeure, Business Continuity and Emergency Operations Framework
Policy Statement 20	Artificial Intelligence Support Bot, Prompt Security and Adversarial Vulnerability Benchmark Standard Operating Procedure

CUSTOMER REGISTRATION, ACCOUNT VERIFICATION AND TERMS OF USE POLICY

Company & Project Scope:	SupportNova E-Commerce Company — All retail consumers, guest users, registered buyers, and mobile application accounts.
--------------------------	---

1. Account Creation and Eligibility Criteria

SupportNova marketplace services are available exclusively to individuals aged 18 years or older who possess full legal capacity to enter into binding digital contracts under applicable laws. Users under the age of 18 may only utilize platform services under the direct supervision and explicit authorization of a parent or legal guardian. Registration requires a verified mobile phone number, a valid email address, and a legal name. Account creation using disposable phone numbers, temporary email addresses, or proxy identities is strictly prohibited and leads to immediate account termination.

2. Account Security, Passwords and Authentication

Users maintain sole and absolute responsibility for maintaining the confidentiality of their account credentials, One-Time Passwords (OTPs), biometric tokens, and passkeys. SupportNova employs multi-factor authentication (MFA) to safeguard account access. Any commercial activity, order placement, or wallet transaction initiated through a verified account shall be deemed executed by the registered account holder. Users must immediately notify SupportNova Customer Operations within two hours of discovering any unauthorized access or security breach.

3. Multiple Account Restrictions and Anti-Abuse Rules

To maintain promotional fairness and platform integrity, SupportNova strictly limits individual consumers to one primary user account per device, phone number, and primary payment method. Registering multiple accounts to illegitimately claim welcome coupons, daily flash-sale vouchers, referral bonuses, or promotional discounts constitutes commercial fraud. Detected duplicate accounts will be permanently suspended, pending orders canceled without refund, and accrued promotional credits forfeited.

4. Account Suspension, Inactivity and Termination Protocols

SupportNova reserves the right to suspend, lock, or permanently delete accounts exhibiting suspicious activity, fraudulent payment attempts, abusive behavior toward customer care agents, or a high frequency of unverified order rejections upon delivery. Accounts remaining inactive for more than 24 consecutive calendar months may be archived, and unredeemed promotional points may expire permanently following a 30-day written electronic notification.

SELLER ONBOARDING, VERIFICATION AND MERCHANT REGISTRATION POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Local marketplace sellers, official brand stores, and cross-border vendors.
--------------------------	--

1. Merchant Categorization and Store Tiers

SupportNova provides three distinct merchant operating tiers: (a) Local Marketplace Sellers: Small and medium enterprises selling domestic products; (b) Official Brand Stores: Verified brand owners, authorized sole distributors, and official brand outlets; (c) Global Collection Cross-Border Sellers: Vetted international vendors shipping directly from overseas warehouses. Each store type operates under specific commission structures, performance service-level agreements, and customer warranty mandates.

2. Know-Your-Business and Identity Verification Rules

All merchant applicants must undergo mandatory verification prior to storefront activation. Individual sellers must submit a valid government-issued National Identity Card or passport, a verified active personal bank account, and proof of utility address. Corporate sellers and official brands must submit valid company registration certificates, active tax identification numbers, trademark registration certificates or brand authorization letters signed by the primary brand owner, and corporate bank statements.

3. Merchant Security Escrow Deposit Requirements

To protect consumers against fulfillment failure, defective merchandise, counterfeit claims, or post-sale liabilities, SupportNova mandates that high-risk and official brand merchants maintain a security deposit escrow. Deposit thresholds are calculated based on merchandise category risk, such as electronics and mobile devices, luxury goods, and standard apparel. The deposit remains held in escrow and may be drawn down by SupportNova to satisfy buyer compensation claims or unpaid marketplace fees.

4. Payout Bank Account Validation and Financial Clearance

Merchant payouts are processed strictly via direct electronic bank transfers to verified financial accounts matching the legal entity name or verified individual owner name registered during onboarding. Third-party bank transfers, payout redirects to unverified accounts, or payouts to anonymous digital wallets are strictly forbidden to prevent money laundering and financial fraud.

ORDER PROCESSING, PACKAGING AND MERCHANT FULFILLMENT STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — All marketplace merchants, fulfillment hub operations, and warehouse supervisors.
--------------------------	--

1. Order Receipt and Service Level Agreement

Upon order placement, merchants receive real-time notifications via the SupportNova Seller Center portal and mobile application. Merchants must accept and confirm order availability within 12 business hours. Standard seller fulfillment requires physical order dispatch within 24 to 48 business hours from order placement. Orders remaining in pending status beyond 48 hours are automatically canceled by the system as fulfillment failures, incurring financial penalties and negative performance ratings.

2. Packaging Standards and Protective Branding Regulations

Merchants must pack items strictly using authorized SupportNova branded packaging, tamper-evident tape, corrugated boxes, and shock-absorbing bubble wrap. Electronics, fragile glass, and high-value merchandise require double-wall cardboard packaging and fragile warning indicators. Substandard packaging resulting in transit damage is deemed 100% merchant fault, waiving shipping carrier liability and resulting in a full refund deduction from the seller balance.

3. Air Waybill Generation and Shipping Label Manifest

Every package must bear a clearly printed, scannable SupportNova Air Waybill generated directly from the Seller Center system. Hand-written labels or altered barcodes are rejected by logistics hubs. The Air Waybill contains scannable tracking barcodes, item category indicators, cash-on-delivery collection amounts, and destination hub routing codes.

4. Courier Handoff and First-Mile Scan Verification

Merchants must hand over packed shipments to designated SupportNova express pickup riders or drop them off at official SupportNova Express Hubs. A shipment is legally recognized as dispatched only when the initial first-mile barcode scan is successfully recorded in the logistics tracking system. Merchants must obtain signed physical dispatch manifests for every batch handed over to pickup couriers.

EXPRESS LOGISTICS, DELIVERY SERVICE LEVEL AGREEMENT AND CASH ON DELIVERY POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Logistics operations, express courier partners, last-mile riders, and buyers.
--------------------------	--

1. Shipping Modes and Standard Delivery Timelines

SupportNova operates three express fulfillment channels: (a) Express Delivery: 24 to 48 hours for intra-city metropolitan orders; (b) Standard Delivery: 3 to 5 business days for nationwide inter-city orders; (c) Cross-Border Global Collection: 7 to 14 business days for international transit. Delivery service levels commence from the timestamp of the first-mile courier scan and are monitored via real-time GPS telemetry.

2. Cash on Delivery Operations and Collection Rules

Cash on delivery is available for eligible orders up to standard transaction limits. Buyers must pay the exact invoiced amount in cash or scan the rider's digital payment terminal prior to opening the sealed outer shipping package. Delivery riders are strictly prohibited from allowing package opening or product testing prior to cash collection or digital payment confirmation.

3. Delivery Attempts, Failed Delivery and Customer Contact Rules

Last-mile riders must make a minimum of three distinct delivery attempts across two consecutive business days. Riders must initiate at least two phone calls to the customer's registered phone number during each attempt. If the buyer is unavailable or rejects the delivery, the package status updates to delivery failed and enters the return-to-origin workflow.

4. Proof of Delivery and Digital Verification Requirements

All successful deliveries require mandatory digital proof of delivery. Riders must record the recipient's signature, a captured one-time password sent to the customer's mobile device at delivery time, or photo verification of physical handoff. Claims of non-receipt for orders with valid verified proof of delivery will be systematically rejected.

CUSTOMER RETURNS, REFUND AND CHANGE OF MIND POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Retail buyers, customer care representatives, and return inspection centers.
--------------------------	---

1. Standard Return Eligibility Windows

SupportNova guarantees a transparent and hassle-free return framework. Retail consumers may initiate return requests within the following statutory windows: (a) Official brand store purchases: 14 calendar days from the delivery date; (b) Standard marketplace purchases: 7 calendar days from the delivery date; (c) Defective or non-conforming items: 14 calendar days from the delivery date.

2. Change of Mind Return Conditions and Category Exceptions

Change of mind returns are accepted exclusively for designated official store items and specific categories, such as fashion and apparel, provided the item is completely unused, unwashed, unworn, and in original condition with all original price tags, brand boxes, and accessories attached. Change of mind is strictly excluded for health and beauty products, underwear and lingerie, personal care items, software or digital codes, mobile phones once unsealed, and customized products.

3. Free Drop-Off and Pickup Logistics Workflows

Customers can return items free of charge by dropping off the securely packed return parcel at any authorized SupportNova express drop-off station, partner courier hub, or by scheduling a reverse pickup for eligible locations. Return parcels must include the printed return authorization slip inside the package.

4. Quality Inspection and Refund Settlement Timelines

Returned merchandise undergoes mandatory quality control inspection upon arrival at the central return assessment hub within 48 business hours. Upon approval, refunds are issued within: (a) SupportNova digital wallet: instant within two hours; (b) Credit or debit card: 5 to 10 business days depending on the issuing bank; (c) Bank account or electronic transfer: 3 to 5 business days.

PROHIBITED, RESTRICTED AND ILLICIT PRODUCTS COMPLIANCE POLICY

Company & Project Scope:	SupportNova E-Commerce Company — All merchants, catalog managers, customs compliance officers, and automated audits.
--------------------------	--

1. Zero-Tolerance Prohibited Goods Listing

SupportNova enforces an absolute zero-tolerance policy against listing illegal, dangerous, or restricted items. Prohibited categories include narcotics, illegal drugs, prescription pharmaceuticals, weapons, firearms, explosives, ammunition, tactical knives, counterfeit currency, forged documents, financial exploits, stolen property, adult explicit material, toxic chemicals, and radioactive materials.

2. Restricted Categories and Mandatory Regulatory Approvals

Products requiring explicit prior government certification and SupportNova compliance approval before listing include dietary supplements and health products requiring regulatory approval, telecommunication equipment and wireless transmitters, infant formula, and electrical appliances requiring energy efficiency safety marks.

3. Automated Catalog Scanning and Image Recognition Audits

SupportNova employs real-time optical character recognition, computer vision image analysis, and keyword filters to continuously scan newly published listings and update modifications. Suspected listings containing hidden prohibited keywords or blurred prohibited images are automatically quarantined pending manual compliance review.

4. Legal Escalation, Asset Freeze and Regulatory Reporting

Sellers attempting to list prohibited or illegal merchandise face immediate permanent store termination, forfeiture of security deposits and escrow funds, and immediate reporting to national law enforcement agencies and cybercrime units.

ANTI-COUNTERFEIT, INTELLECTUAL PROPERTY AND BRAND PROTECTION POLICY

Company & Project Scope:

SupportNova E-Commerce Company — Brand owners, patent and trademark holders, marketplace sellers, and the legal team.

1. Absolute Guarantee of Product Authenticity

SupportNova strictly prohibits the listing, sale, or distribution of counterfeit items, unauthorized replicas, knock-offs, or grey-market parallel imports violating active registered patents, trademarks, or copyrights. Every item sold on SupportNova must be 100% authentic and lawfully sourced.

2. Intellectual Property Rights Protection Portal

Brand owners, authorized legal representatives, and patent holders can register on the SupportNova Intellectual Property Rights Portal to report suspected trademark infringements, patent violations, copyright theft, or unauthorized image usage. Valid takedown notices accompanied by trademark registration certificates are processed within 24 business hours.

3. Merchant Evidence Audits and Supply Chain Proof

Upon receipt of an intellectual property infringement complaint, the flagged merchant must provide conclusive proof of authenticity within 48 hours. Valid proof includes direct manufacturer sales invoices, authorized brand distribution certificates, or official import bills of lading. Failure to provide verified documentation results in immediate listing deletion.

4. Counterfeit Penalties, Buyer Compensation and Store Liquidation

If an item is confirmed counterfeit: (a) The buyer receives a 100% full refund plus a 100% store credit compensation under the authenticity guarantee; (b) The seller's account is permanently terminated; (c) All payout funds and security deposits are liquidated to satisfy buyer compensation and legal costs.

MERCHANT RATING SYSTEM, PERFORMANCE METRICS AND PENALTY MATRIX

STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — Marketplace operations, merchant success managers, and all active merchants.
--------------------------	---

1. Core Merchant Performance Indicators

Merchant performance is continuously monitored across four key metrics over a rolling 30-day evaluation window: (a) Seller cancellation rate must remain below 1.0%; (b) Late dispatch rate must remain below 2.0%; (c) Return due to seller fault rate must remain below 1.5%; (d) Chat response service level requires a minimum of 90% of customer inquiries answered within 30 minutes.

2. Store Rating Scorecard and Buy-Box Allocation

Merchants maintaining a seller rating above 85% with positive customer reviews receive priority search ranking placement, eligibility for daily flash sales, and higher buy-box allocation. Merchants dropping below a 70% rating lose promotional eligibility and search visibility.

3. Tiered Penalty System and Sanctions Schedule

Breaching performance thresholds triggers automated tier penalties ranging from warnings and daily order limits for minor breaches, to 14-day store freezes for moderate breaches, and permanent store bans for severe fraud or repeated performance failures.

4. Merchant Appeal and Corrective Action Plan Workflow

Merchants receiving temporary restrictions or severe sanctions may file a formal appeal within seven calendar days by submitting a detailed corrective action plan outlining warehouse process improvements, staff retraining, and inventory synchronization fixes. Appeals are reviewed by the merchant governance board within three business days.

PAYMENT PROCESSING, ESCROW SERVICES AND FINANCIAL SETTLEMENT POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Finance department, payment partners, merchants, and transacting buyers.
--------------------------	---

1. Approved Payment Methods and Digital Processing

SupportNova supports seamless and secure multi-channel payments, including credit and debit cards, digital wallets, direct internet bank transfers, cash on delivery, and easy monthly installment plans on major credit cards.

2. SupportNova Escrow Protection and Holding Protocol

All buyer payments collected at checkout are deposited into a segregated SupportNova client money escrow account. Payout funds remain locked during transit and throughout the mandatory customer return inspection window. Payouts are released to the seller's clear balance only after the return window expires without dispute.

3. Merchant Payout Cycles and Statement Reconciliation

Seller payouts are processed on a weekly or bi-weekly automated cycle. Payout statements detail gross sales revenue, deducted platform commission fees, payment gateway processing fees, shipping fee adjustments, return refunds, and applicable tax withholdings. Funds are transferred directly to verified seller bank accounts.

4. Statutory Tax Withholding and Government Compliance

In compliance with national tax laws, SupportNova automatically deducts applicable sales tax on services, income tax withholdings, and value-added tax from gross seller payouts and remits them directly to national revenue authorities. Sellers receive official tax deduction certificates quarterly.

OFFICIAL BRAND STORE REGULATIONS AND STORE CHARTER POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Brand owners, exclusive distributors, and official store operations.
--------------------------	---

1. SupportNova Official Store Onboarding Eligibility

SupportNova Official Stores represent the premium destination for authentic brands. Eligibility requires direct brand ownership or exclusive national distribution rights, active trademark registration, physical retail presence or recognized global brand equity, a commitment to 100% authentic products, and adherence to premium packaging standards.

2. Mandatory Service Commitments for Official Stores

All official storefronts must strictly uphold three core consumer promises: (a) 100% authentic products guarantee; (b) 14 calendar days easy return policy; (c) Express guaranteed fast delivery service level. Violation of any core promise results in immediate official store status revocation.

3. Storefront Customization and Brand Asset Guidelines

Official store merchants receive advanced brand store layouts, custom banner modules, video integration, and dedicated brand day promotional slots. Banners and product imagery must adhere strictly to high-resolution visual guidelines, prohibiting low-quality graphics, watermarks, or third-party promotional clutter.

4. Official Store Audit, Mystery Shopping and Quality Assurance

SupportNova conducts quarterly mystery shopping audits and unannounced warehouse quality checks on official store merchants. Stores falling below a 90% positive rating or failing authenticity checks lose their official badge and are demoted to the standard marketplace tier.

CUSTOMER REVIEWS, RATINGS AND ANTI-REVIEW MANIPULATION POLICY

Company & Project Scope:

SupportNova E-Commerce Company — All buyers, merchants, content moderation teams, and automated abuse engines.

1. Verified Buyer Review System

Customer product reviews and ratings are restricted exclusively to buyers who have completed a verified purchase and received delivery of the item. Reviews can be submitted within 30 days of delivery and may include star ratings, detailed text feedback, photos, and unboxing videos.

2. Prohibited Review Content and Moderation Standards

Reviews containing profanity, hate speech, personally identifiable information, external website links, competitor advertisements, or irrelevant content are automatically filtered and removed by artificial intelligence content moderation systems.

3. Zero-Tolerance Policy on Fake Reviews and Incentives

Merchants are strictly prohibited from manipulating review ratings through brushing, offering financial rewards, free gifts, or discount coupons in exchange for 5-star reviews, or coercing customers to remove negative reviews. Violations lead to immediate product link deletion and seller account suspension.

4. Seller Response Guidelines and Dispute Resolution

Merchants may post professional and courteous responses to customer reviews via the seller center. Merchants cannot edit or delete customer reviews directly but may flag abusive or blackmailing reviews to SupportNova moderation for independent investigation within 48 hours.

VOUCHERS, FLASH SALES AND PROMOTIONAL CAMPAIGN PARTICIPATION RULES

Company & Project Scope:	SupportNova E-Commerce Company — Campaign managers, participating merchants, buyers, and the marketing team.
--------------------------	--

1. Mega-Campaign Participation Eligibility

Merchants participating in major shopping events must meet strict eligibility criteria, including a minimum seller rating of 80%, zero active intellectual property or counterfeit penalties, and physical inventory stock committed in the warehouse.

2. Price Integrity and Fake Discount Bans

SupportNova enforces strict historical price tracking. Merchants are prohibited from artificially inflating product prices immediately prior to a campaign to give a false impression of deep discounting. Campaign prices must reflect the lowest price offered for that item in the preceding 60 calendar days. Non-compliant listings are disqualified.

3. Voucher Types, Co-Funding and Redemption Rules

SupportNova offers platform vouchers, seller vouchers, bank co-funded vouchers, and free shipping vouchers. Vouchers are non-transferable, non-refundable for cash, and limited to one redemption per verified user account and transaction.

4. Anti-Voucher Abuse and Bot Prevention

Automated bot traffic, script-based voucher claiming, and multi-account voucher farming are blocked by real-time security systems and device-fingerprinting security. Vouchers claimed via automated exploits are invalidated instantly.

CUSTOMER SERVICE, LIVE CHAT SERVICE LEVEL AGREEMENT AND ESCALATION GOVERNANCE POLICY

Company & Project Scope:	SupportNova E-Commerce Company — Customer support teams, merchant chat representatives, and all platform users.
--------------------------	---

1. Instant Buyer-Seller Messaging Protocols

SupportNova provides an integrated live chat messaging system enabling direct communication between buyers and sellers. Live chat must be utilized exclusively for product inquiries, pre-purchase technical questions, order status updates, and post-sale support.

2. Merchant Chat Response Time Service Level Agreement

Merchants are required to maintain a chat response rate of at least 85% and reply to customer messages within 30 minutes during standard business operating hours. High chat response speed significantly increases store search ranking.

3. Prohibited Off-Platform Communication and Contact Sharing

To prevent fraud, off-platform scams, and payment evasion, buyers and sellers are strictly forbidden from sharing personal phone numbers, messaging app contacts, bank account details, external website links, or requesting payments outside the SupportNova platform. Automated messaging filters redact sensitive contact details in real time.

4. Escalation to SupportNova Dispute Resolution Officers

If a buyer and seller fail to resolve a product complaint or return issue within 48 hours via live chat, either party may escalate the issue. A dedicated dispute officer will review chat logs, order history, and evidence to issue a binding final decision within 24 hours.

CROSS-BORDER GLOBAL COLLECTION COMMERCE AND IMPORT CUSTOMS STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — Cross-border merchants, overseas logistics carriers, and customs brokers.
--------------------------	--

1. Global Collection Store Designation

SupportNova Global Collection allows vetted international manufacturers and overseas merchants to offer products directly to local consumers. All cross-border listings must clearly display the global collection badge and declare expected international shipping lead times of 7 to 14 business days.

2. International Freight, Tracking and First Scan Service Level Agreement

Overseas merchants must process and hand over international shipments to SupportNova designated air express carriers within 48 business hours of order placement. Full international end-to-end tracking from the overseas origin warehouse to local doorstep delivery is mandatory.

3. Customs Clearance, Duties and Delivered Duty Paid Rules

All global collection items are priced on a delivered duty paid basis. Total checkout prices include item cost, international air freight, local customs clearance fees, import duties, and taxes. Buyers incur zero additional customs cash payments upon delivery.

4. Cross-Border Returns and Local Return Hub Handling

To eliminate expensive international return freight for consumers, all cross-border returns are processed locally at SupportNova's domestic return hubs. Approved return items are inspected locally and refunded immediately without requiring re-export to origin countries.

CUSTOMER DATA PRIVACY, PROTECTION AND GENERAL DATA PROTECTION REGULATION POLICY

Company & Project Scope:	SupportNova E-Commerce Company — All platform users, the data protection officer, and the information technology team.
--------------------------	--

1. Personal Data Collection and Legal Processing Basis

SupportNova collects and processes personal information strictly necessary for fulfilling marketplace services, including legal name, delivery address, phone number, payment details, device Internet Protocol address, and browsing preferences. Data processing complies with local personal data protection acts and global privacy standards.

2. Data Encryption, Storage and Information Security

All sensitive user data, payment tokens, and password hashes are encrypted both in transit using modern transport layer security and at rest using advanced encryption standards within certified secure cloud data centers. Credit card details are never stored directly on platform servers and are tokenized via secure payment gateways.

3. Third-Party Data Sharing Restrictions

SupportNova never sells, rents, or trades customer personal data to third-party advertisers. Limited customer information, such as delivery address and phone number, is shared strictly with assigned logistics courier riders solely for completing physical package delivery.

4. Customer Privacy Rights and Data Deletion Requests

Users retain complete rights to access, update, correct, or request permanent deletion of their personal platform data under the right to be forgotten. Account deletion requests submitted via the privacy center are fulfilled within 14 calendar days, subject to statutory record retention requirements.

FRAUD PREVENTION, ACCOUNT SECURITY AND ANTI-SCAM GOVERNANCE
STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — Cyber security operations center, fraud analysts, and all platform users.
--------------------------	--

1. Automated Real-Time Fraud Monitoring

SupportNova employs sophisticated machine learning fraud detection systems that continuously analyze transaction parameters, device fingerprints, velocity metrics, and payment card behaviors. High-risk transactions triggering fraud flags are automatically paused for manual verification.

2. Anti-Phishing and Fake Website Awareness Directives

SupportNova official communications occur strictly within the official mobile application, verified domain website, and official messaging shortcodes. SupportNova staff will never contact customers asking for passwords, one-time passwords, personal identification numbers, or card verification values. Users are warned against clicking third-party phishing links.

3. Unauthorized Payment Recovery and Buyer Protection

If a user identifies an unauthorized transaction executed using their compromised payment card on SupportNova, they must notify fraud operations and their card issuing bank within 24 hours. Upon verification, funds are frozen in escrow and refunded to the victim.

4. Prosecution of Fraudulent Activity

Engaging in payment card fraud, chargeback abuse, fake delivery location scams, or extortion attacks against support staff triggers immediate legal prosecution under national cybercrime laws.

FULFILLMENT BY SUPPORTNOVA EXPRESS WAREHOUSE OPERATIONS

STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — Warehouse managers, consignment merchants, and inventory auditors.
--------------------------	---

1. Fulfillment by SupportNova Overview

Fulfillment by SupportNova is a premium consignment fulfillment service where sellers store their physical inventory directly inside climate-controlled automated fulfillment centers. Consignment items receive a dedicated express badge, elevated search placement, and guaranteed same-day dispatch.

2. Warehouse Inbound Scheduling and Quality Inspection

Merchants must schedule inbound inventory shipments via the seller center inbound portal at least 48 hours in advance. Delivered inventory undergoes strict inbound quality inspection covering packaging integrity, barcode scan validation, and manufacturing expiry date verification. Non-compliant inbound shipments are rejected.

3. Storage Fees, Inventory Aging and Liquidations

Consignment inventory is subject to standard storage fee schedules based on cubic meter volume. Inventory remaining unsold beyond 90 calendar days incurs long-term storage surcharges. Merchants receive automated notifications to discount, recall, or authorize liquidation of slow-moving aged stock.

4. Inventory Loss and Damage Guarantee

SupportNova assumes 100% financial liability for consignment stock damaged, lost, or stolen while stored inside fulfillment centers. Verified inventory losses are compensated to transparently reimburse the merchant at current full retail value minus standard platform commission fees.

HAZARDOUS MATERIALS, LITHIUM BATTERY AND DANGEROUS GOODS TRANSPORT STANDARD OPERATING PROCEDURE

Company & Project Scope:	SupportNova E-Commerce Company — Dangerous goods specialists, warehouse handling staff, and logistics carriers.
--------------------------	---

1. Dangerous Goods Classification

Dangerous goods include products containing flammable liquids, compressed gases, corrosive chemicals, lithium-ion batteries, perfumes, aerosol sprays, and power banks. These items require specialized handling, surface-only transport, and explicit safety labeling.

2. Lithium Battery Packaging and Shipping Directives

Products containing standalone lithium batteries or equipment with internal batteries must comply with international transport safety standards. Standalone power banks are strictly restricted to surface ground transportation and barred from air freight.

3. Safety Testing and Material Safety Data Sheets

Merchants listing hazardous materials must upload valid material safety data sheets and battery safety test reports issued by certified testing laboratories. Listings lacking required documentation are blocked from dispatch.

4. Specialized Hazard Labeling and Handling Standards

Outer packaging for hazardous shipments must feature mandatory hazard warning labels, orientation arrows, and battery handling marks. Courier transport vehicles carrying dangerous goods must be equipped with spill containment kits and dry powder fire extinguishers.

FORCE MAJEURE, BUSINESS CONTINUITY AND EMERGENCY OPERATIONS FRAMEWORK

Company & Project Scope:	SupportNova E-Commerce Company — Executive leadership, the crisis management team, and all departments.
--------------------------	---

1. Force Majeure Event Definition

Force Majeure events are extraordinary and unavoidable circumstances beyond reasonable human control, including natural disasters such as floods and earthquakes, war, civil unrest, national strikes, government curfews, viral pandemics, major power grid failures, or undersea internet cable cuts.

2. Operational Adjustments During Emergency Events

Upon formal declaration of a force majeure event by executive leadership: (a) Delivery service levels across affected geographical zones are automatically extended; (b) Merchant late dispatch penalties are paused; (c) Unreachable return packages are held securely in regional hubs without penalty.

3. Communication Protocols and Customer Notifications

SupportNova's crisis command center issues automated real-time banners, application push notifications, and email alerts informing buyers and sellers of regional logistics delays, modified operating hours, or temporary hub closures.

4. System Redundancy and Cloud Disaster Recovery

SupportNova maintains active-active multi-region cloud server redundancy and automated database replication. In the event of a primary data center outage, secondary failover clusters activate within 60 seconds to ensure uninterrupted platform operation and financial security.

ARTIFICIAL INTELLIGENCE SUPPORT BOT, PROMPT SECURITY AND ADVERSARIAL VULNERABILITY BENCHMARK STANDARD OPERATING PROCEDURE

Company & Project Scope:

SupportNova E-Commerce Company — Artificial intelligence engineering team, cyber security officers, and support agents.

1. Purpose and Artificial Intelligence Operational Boundary Standards

This standard operating procedure establishes mandatory security boundaries for SupportNova's automated artificial intelligence customer support bots and large language model agents. The support bot acts exclusively as a helpful customer support assistant and is strictly restricted from performing administrative database modifications, issuing unauthorized refunds, or revealing internal system instructions.

2. Adversarial Vulnerability Benchmark and Prompt Security Protocols

To safeguard against sophisticated cyber attacks and indirect prompt manipulation, SupportNova artificial intelligence models are rigorously benchmarked against twenty distinct adversarial attack patterns across operational modules, ensuring total system resilience against prompt extraction, simulated command execution, jailbreak personas, hallucinated policy clauses, environment variable exfiltration, roleplay social engineering, structured query language injections, authority impersonation, historical context fabrication, markdown data exfiltration, superuser command injections, obfuscated base64 instruction payloads, channel promise manipulation, cross-site scripting, recursive denial of service loops, reputation blackmail threats, session hijacking, out-of-band promises, indirect metadata injections, and forged executive guarantees.
